## Doc's Casting Plaster And Elixir

This miraculous casting plaster will effectively let one person wax, invest, cast, (maybe with diamonds in place) and finish in one day, all by themselves. The time from wax to cast is only three hours, you can mix it with a ten dollar cake mixer, totally avoid the hassles of buying and using steel flasks and flask tape, and get a clean surface to boot!

Because the suggested casting temperature is only 600 degrees Fahrenheit, one person can easily cast platinum alone, unlike the bad old days when two people blinded by safety glasses tried to simultaneously melt the platinum, get the flask from a 1600 degree oven, and put it in the cradle, and let fly hopefully without error or misunderstanding.

I affectionately call this outdated ritual the "two blind man platinum dance of danger" Try it our way instead. We offer full tech support for platinum casting with our plaster or our metals.

If you are new to Docs' we will include a video companion to the instructions that is a DVD. The DVD will play on either a home theater system or on a DVD player equipped computer or game console. I'm told by the bosses ten year old daughter the Playstation2 works great.

360 gram Flasks	\$30.00
25 lb box With 6 bottles solution	\$165.00
Binder (1qt)	\$10.00

**In stock, every day, 95%Pt/5% Ru, and 90%Pt/10%Ir
