Plumb Tarnish Resistant Silver Solder

AG-H 92.5% Silver

If you would like to try this revolutionary plumb silver solder, just give Daniel a call at the above numbers or email. He will send you some of this solder at no charge. This way, there is no risk in trying the new solder. It's on us!

Most jewelers are well aware that "plumb" solders are the way to go for strength, color matching and long term durability of a solder joint. Plumb solders remove any concern about using "lesser" metals on a fine piece of jewelry.

Now, as a special offering to silver manufacturers, we offer plumb silver solder. These plumb solders are actually 92.5% (hard flow) Color just like your sterling casting grain or sheet or wire.

This solders have perfect color, before and after you use them. It responds well to traditional sterling silver.

The cost for this new solder is a bit higher than those ordinary solders that contain merely 30% or maybe 40% silver for reasons that are obvious. Besides the silver content, there is the savings from being sure you will only solder something once, and never worry about the customer returning with a blackened solder line.

Regular & Plumb Pricing

Silver Solder	\$7.67	Unit	Temp's
XE	0.3	\$2.30	1300
