Refining Charges

Precious Metals West/Fine Gold performs refining geared to smaller lots. Each lot is handled individually in it's own beaker all the way through to it's own conclusion. We don't merely smelt/assay/combine lots. (Like our larger refining competitors)

We also offer "Stone recovery" or "Same molecules" (5%charge) on request. We charge an honest 2.5% (of your 24kt. giving a mutual interest in a high result) for clean bench filings. with a small \$50.00 minimum charge.

GOLD (97.5%)

\$50.00 Minimum All clean scrap and clean bench filings fall into this category. Your returned 24k is then multiplied by .975 which is less our refining charge. The net amount after charges is then multiplied by the spot market to attain the dollar value. Results will be sent within 1 to 2 weeks.

Platinum

Platinum scrap and platinum/ gold scrap is melted and assayed to determine gold and platinum content. There will be an assay fee for platinum. A 10%-15% refining fee applies to each metal and is calculated at spot market. Results will be sent within 1 week.

All other materials can be quoted by phone. Just call with a good description of the material, and we can quote the job. If you need assays or scientific analysis, we have sources in the analytical community that can help.
